For most investors, how much a stock's price changes over time is important. This factor can impact your investment portfolio as well as help you compare investment results across sectors and industries.

Another factor that can influence investors is FOMO, or the fear of missing out, especially with tech giants and popular consumer-facing stocks.

What if you'd invested in ON Semiconductor Corp. (ON) ten years ago? It may not have been easy to hold on to ON for all that time, but if you did, how much would your investment be worth today?

billion in 2022. The company generated 18% of total revenues in 2022 from the United States.

Bottom Line

Anyone can invest, but building a successful investment portfolio takes a combination of a few things: research, patience, and a little bit of risk. So, if you had invested in ON Semiconductor Corp. a decade ago, you're probably feeling pretty good about your investment today.

A \$1000 investment made in May 2013 would be worth \$10,474.62, or a 947.46% gain, as of May 24, 2023, according to our calculations. Investors should note that this return excludes dividends but includes price increases.

In comparison, the S&P 500 gained 151.17% and the price of gold went up 36.27% over the same time frame.

Going forward, analysts are expecting more upside for ON.

onsemi is benefiting from broad-based strength across industrial, computing, consumer and automotive end-markets for both silicon carbide and insulated-gate bipolar transistor-based products. Its first-quarter 2023 results benefited from strong revenue growth in Power Solutions and Intelligent Sensing Group. However, earnings declined due to lower gross and operating profit. Nevertheless, the company is winning market share in the automotive segment thanks to its silicon carbide dominance as well as intelligent power and sensing solution. onsemi's EliteSIC silicon carbide modules increase the efficiency and lower the weight of the traction inverters, extending electric vehicle range and improving performance. Shares have outperformed the industry year to date. However, investments on silicon carbide ramp will hurt margin in the near term.

Shares have gained 17.33% over the past four weeks and there have been 14 higher earnings estimate revisions for fiscal 2023 compared to none lower. The consensus estimate has moved up as well.
